# FEATURED PROJECTS

BOSCH (BIDADI)

TKAP

BOSCH (SOLAR)

**Client : BOSCH ( Bidadi )**

**Nature of Work : Land Reclamation & Nala Rerouting**

- Land reclamation was carried out on about 100 Acres of undulated land to specified levels for the BOSCH manufacturing plant set up in Bidadi Industrial. The difference between the topmost and the bottommost point being 14m required cutting and filling of about 550000 m<sup>3</sup> of soil followed by multiple layers of compaction.
- NALA passing through the middle of the site was diverted in line with governmental regulations using 2400mm spun pipes placed underground. The underground pipeline stretching 800 running metres was laid at a slope of 1m and individual pipes connected using single joint rubber ring.
- In line with our corporate social responsibility goals, we enacted risk management protocols to protect the wildlife such as snakes and other animals.

**Client : TOYOTA KIRLOSKAR AUTO PARS (TKAP)**

**Nature of Work : Roads, Drains & Site Reclamation**

- The site reclamation carried out for Toyota Kirloskar Auto Parts Manufacturing plant required borrowing of soil from outside the factory premises and using the borrowed soil to fill up layers upto a height of about 12m.
- About 2.5 Km of roads were laid and necessary drainage was provided inside the factory premises.

**Client : BOSCH (Solar Project)**

**Nature of Work : Site Grading & Control Room Building**

- The solar plant planned in Bidadi Industrial Layout, required excavation of about 20,000 m<sup>3</sup> and site grading of 12 Acres of land.
- The excavation was followed by construction of a control room for the solar plant including external works like internal roads and kerbs, storm water drain, cable trench, overhead tank, etc.
